

Designed for the front line

Blackboard® has a proven history of delivering best-in-class training for law enforcement. Provide engaging, tailored, and secure programmes for your officers, with robust reporting to monitor skills development and promote excellence.

Engaging, real-world activities, available on demand

Blackboard provides tools to recreate the critical situations your officers face. Keep learners engaged with 360° video, AI-powered conversation, and other unique learning activities, as part of a training programme tailored to their needs. A great mobile experience—including offline access—means they can learn anytime, anywhere.

- Practical learning tasks—including 360° video and virtual reality
- AI Conversation tool for assessment of depth and application of knowledge
- Synchronous and asynchronous programmes
- Mobile-first design, with extensive offline access
- Integrated content translation and creation of alternative formats, such as audio

Faster programme development, powered by AI

Creating great training programmes shouldn't take all day. With Blackboard, instructors can leverage AI-powered design tools to streamline the creation of programmes and assessments—with 96% of instructors reporting these features save them time.

- AI Design Assistant for programme and assessment creation
- Blackboard Content Designer for multi-media documents
- Flexible Grading interface for fast assessment and feedback
- Easy digitisation of textbooks and other traditional training materials

Ensure adherence to the highest standards

Blackboard makes it easy to evaluate the skills development of your officers. Establish clear outcomes for training tasks, including those that have regulatory standards, leverage native badging to recognise the attainment of key skills, and access detailed reporting to understand progress and identify priorities for future training.

- Learning outcomes
- Alignment with regulatory requirements
- Badging and Mastery Gradebook to recognise key competencies
- In-line insights for all users to understand their progress
- Detailed reporting for administrators

Committed to data security

We understand that your organisation handles sensitive information and provide **high levels of data security and data protection** for your peace of mind. This includes GDPR compliance, ISO 27001/27018/27701, and SOC 2 certifications.

A trusted partner for law enforcement

In all corners of the globe, leading agencies trust Blackboard to deliver engaging training programmes that develop their teams.

“We liked how robust Blackboard was, but we also loved that it was... really safe for corrections and we don't have to worry about there being any breach in security.”

—Jennifer Brunenn, Education Coordinator, Kansas Department of Corrections
