Blackboard Learn for Government

Modern. Simple. Secure. A new kind of LMS.

Blackboard Learn, our premier Learning Management System (LMS), provides instructors with the autonomy to author and deliver modern, inclusive, and consistent training experiences that learners desire — anytime, anywhere.

Key Capabilities:

- Provide blended learning experiences that improve learner outcomes

- Share everything in one place to streamline instructor-learner workflows

- Enable learning teams to work independently of HR systems, while still being connected

- Impact continuous improvement with real-time insights

- Meet agency requirements for system and data security

Blackboard®
LEARN

Discover a superior test-taking experience

Flexible assessment types and customizable feedback support instructors' unique approaches while providing learners with control of strategies best suited for their assessment success — all resulting in easier and more effective teaching and learning.

Deliver an inclusive learning environment

Personalized learning experiences, which offer learners the flexibility to access courses on the go, empower expression within an equitable, all-encompassing ecosystem — built with accessibility in mind.

Ensure flexible access

Expand the scope of learning with courses that are accessible to employees, stakeholders, and contractors, integrate with HR software and allow for self-registration.

Inject autonomy and action

Data insights drive success and provide engaging learning experiences. Learners can track their own progress, identify next steps, and get the support they need. Instructors can identify disengaged or struggling learners even sooner.

Product roadmap informed by instructors and learners

Blackboard Learn is the only LMS that offers design and functionality based on direct feedback from the global education community.

Blackboard Learn for Government in Action

"And so we are the information lever of national power and Blackboard [Learn] is right there. It makes sense. It's an information technology system, but it's one that we can grow with — we're excited about growing with."

Mr. Harry Wingo, J.D.
Assistant Professor

National Defense University's College of Information and Cyberspace

We are committed to providing you with secure learning solutions.
The U.S. federal government has awarded FedRAMP® moderate SaaS authorization to Blackboard Learn on Amazon Web Services (AWS) GovCloud. And, we are the only LMS provider to hold the AWS Government certification.

Government Channel Partners
We work together with our partners to ensure you're getting all the tools necessary to be more productive, efficient, and better trained in today's ever-changing information environment.
