

Blackboard® Learn StateRAMP Authorization Guide

In continuation of Anthology's investment into security accreditation stretching back over 15 years, Blackboard Learn SaaS in AWS GovCloud was recently granted StateRAMP Moderate authorization. This recognition, along with FedRAMP Moderate and work underway in pursuit of DISA's IL4, continue to demonstrate Anthology's ongoing commitment to service of our state government and higher education clients who require advanced degrees of certification or operation on their networks.

Why Choose a StateRAMP Authorized Solution?

StateRAMP is an advocate for strong but fair cybersecurity standards; they work to bring together service providers, policy makers, industry experts, and government officials to drive the future of cybersecurity. Their members lead, manage, and work in various disciplines across the United States and are all committed to making the digital landscape a safer, more secure place. By choosing a StateRAMP authorized solution like Blackboard Learn SaaS in AWS GovCloud, you are ensuring that your institution meets well recognized standards of cybersecurity and compliance. StateRAMP authorization provides the following benefits:

- **Compliance with State Regulations:** The StateRAMP authorization supports your institution's goal for compliance with state-level regulations and cybersecurity requirements. This helps you avoid potential legal and financial risks associated with non-compliance.
- **Risk Mitigation:** StateRAMP conducts thorough assessments of authorized solutions, identifying and mitigating potential cybersecurity risks. By choosing a StateRAMP authorized solution like Blackboard Learn, you can be confident that your institution's data is protected against threats.
- **Enhanced Trust and Confidence:** The StateRAMP authorization is a seal of approval that demonstrates your institution's ongoing commitment to cybersecurity best practices. It enhances trust and confidence among stakeholders, including faculty, employees, learners, and leadership.
- **Access to Authorized Solutions:** StateRAMP provides a curated list of authorized solutions, making it easier for institutions to identify and choose secure and compliant technologies. By selecting a StateRAMP authorized solution like Blackboard Learn, you are making a strategic investment in the security and success of your institution.

Why Choose Blackboard Learn?

Blackboard Learn SaaS in GovCloud is a cutting-edge learning management system (LMS) that is trusted by government agencies and educational institutions around the world. With its StateRAMP Moderate authorization, you can be confident that Blackboard Learn SaaS in GovCloud adheres to the strictest cybersecurity standards and is compliant with state-level regulations.

- **Unmatched Security:** Blackboard Learn SaaS in GovCloud is designed with security at its core. It undergoes rigorous assessments and audits to ensure that your data is safeguarded against threats. With StateRAMP authorization, Blackboard Learn SaaS in GovCloud meets high standards of cybersecurity, providing peace of mind for your institution and learners.
- **Seamless Integration:** Blackboard Learn SaaS in GovCloud seamlessly integrates with your existing HRIS and educational technology systems, making it easy to implement and adopt. Its user-friendly interface and intuitive navigation make it simple for instructors, staff, and learners to access course materials, collaborate, and engage in the learning process.
- **Enhanced Features:** Blackboard Learn SaaS in GovCloud offers a wide range of features that enhance the teaching and learning experience. From interactive discussion boards and assessments to multimedia content creation and full mobile accessibility, Blackboard Learn SaaS in GovCloud empowers instructors to create engaging and dynamic courses that meet the needs of today's learners.
- **Expert Support:** With Blackboard Learn SaaS in GovCloud, you gain access to a dedicated team of experts who provide ongoing support and assistance. From implementation to training to troubleshooting, Blackboard's customer support team is available to ensure that your institution gets the most out of its LMS investment.

With Blackboard Learn SaaS in GovCloud being StateRAMP Moderate authorized, you can be confident that you are choosing a secure, compliant, and trusted learning management system for your institution. Blackboard Learn SaaS in GovCloud offers high levels of security, seamless integration, enhanced features, and expert support, while the StateRAMP authorization provides compliance, risk mitigation, trust, and access to authorized solutions. Elevate your institution's cybersecurity posture with Blackboard Learn SaaS in GovCloud, the authorized StateRAMP solution.
